

DisplayPort to HDMI VGA 2 in 1 Adapter

Item no. FS12104

Specification:

- Insulation: Foamed PE SKIN/HDPE
- Wire Gauge: 30AWG
- Outer diameter: 5.0mm

Description:

Our DisplayPort to HDMI VGA adapter allows you to connect DisplayPort-compatible devices such as computers, laptops, or Set-top Boxes directly to HDTVs, monitors, or projectors with HDMI or VGA ports.

HDMI can output visuals up to 4K*2K@30Hz, and VGA can provide up to 1080P@60Hz. However, remember that while it has both HDMI and VGA, it can only operate one at a time.

This adapter offers a stereo setup feature. If you're using Windows 10, you can easily manage the audio output by selecting the appropriate device from the sound settings.

It boasts gold-plated connectors and tinned copper conductors, triple-shielded with twisted pair aluminum foil.

The ABS shell housing ensures durability, and the PVC jacket adds an extra layer of protection.
